Description

To speak with Spiritualized: „Ladies and Gentlemen, we are floating in space“

After two amazing releases („The Night The Stars Flew“/Electrosound & „Into Vernadsky“/12rec), Astrowind come up with another great 7-track-EP.

Deeply influenced by german krautrock, „Somewhere The Music Had Been Played“ puts you in a warm blanket and let you float in time and space. This deep harmonic atmosphere guides you through the complete release.

From the first track soft bubbling synth-patterns and soundscapes take you by the hand and let you forget time and space around you. And leave you after 35 minutes in a calm and peaceful condition.

By the way: The whole EP was recorded during a live improvisation on soviet-era analog synth and desktop FX. An exciting example of creating music together spontaneously.
